

AJAY NISHAD

SENIOR FULL STACK ENGINEER | REACT • NODE.JS • REACT NATIVE • AI APPLICATIONS

Lucknow, India | +91-7070360901 | ajaynishad782@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years of experience designing and delivering production web and mobile applications across logistics, fintech, healthcare, and business automation. Strong expertise in React.js, React Native, Node.js, Express.js, NestJS, MongoDB, PostgreSQL, and MySQL, with hands-on experience in scalable architecture, API design, performance optimization, real-time workflows, authentication, and end-to-end product delivery. Experienced in technical leadership, mentoring developers, and integrating AI capabilities using Azure OpenAI.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, NestJS

Databases: MongoDB, PostgreSQL, MySQL

State & Data: Redux Toolkit, Context API, TanStack Query

API & Architecture: REST APIs, GraphQL, JWT Authentication, RBAC, Modular Architecture, Scalable Design, Performance Optimization

DevOps & Tools: Git, GitHub, CI/CD, Docker, Postman, Jira

AI Application Development: Azure OpenAI, AI-powered document processing, LLM-assisted development with Claude, Gemini, ChatGPT, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Developer | DEVtrust Enterprises | Mar 2023 - Present

- Lead architecture and development of scalable web and mobile applications supporting complex business workflows across multiple domains.
- Own end-to-end delivery from requirement analysis and technical design through development, testing, production deployment, and support.
- Act as a technical lead for frontend and mobile teams, guiding architecture decisions, code quality, maintainability, and scalability.

Software Developer | Observance Solutions | Sep 2022 - Feb 2023

- Built high-performance applications with complex state management and real-time data handling.
- Designed secure REST APIs and authentication systems for production applications.
- Improved user experience and application performance through code refactoring, load-time optimization, and targeted performance tuning.

Software Developer | DEVtrust Enterprises | Jan 2021 - Aug 2022

- Developed full-stack MERN applications and cross-platform React Native mobile applications.
- Implemented modular application architecture to improve maintainability, scalability, and delivery consistency.
- Diagnosed and resolved performance bottlenecks in high-traffic applications and production workflows.

Web Developer | Lead Scraper Technology | Sep 2019 – Dec 2020

- Developed custom WordPress solutions with a focus on performance, responsive implementation, and SEO improvements.
- Integrated third-party APIs and automated business workflows using MySQL-backed applications.

SELECTED PROJECTS

Moveit4U – Transportation Management System

- Re-architected an underperforming transportation platform into a more scalable logistics solution.
- Implemented role-based operational workflows and real-time tracking capabilities for logistics teams.
- Worked on system stability and performance improvements across core operational workflows.

Invoice Bridge AI – AI Invoice Automation

- Built an AI-powered invoice processing solution using Azure OpenAI to automate invoice data extraction.
- Integrated extracted invoice information with ERP workflows to reduce manual processing effort.
- Designed application workflows around automated document processing and business-data handling.

Ezeryeshiva – Appointment & Workflow Platform

- Replaced Airtable-based workflows with a scalable custom application.
- Improved data integrity, workflow control, and operational efficiency through purpose-built application flows.

Spero Institute – Therapy Management System

- Developed patient tracking and clinician workflow tools to support day-to-day operational processes.

The Park Gym – Member Management System

- Developed member and staff management capabilities for a boxing and fitness gym management platform.

MOBILE APPLICATIONS

- Moveit4U Driver App – real-time logistics tracking and operations.
- Luminous Breast App – health tracking and awareness platform.
- Quant Capital – fintech investment platform with trading integration.
- The Park Gym – member and staff management application for a fitness and boxing gym.

LEADERSHIP & IMPACT

- Led frontend and mobile architecture decisions across multiple client and product initiatives.
- Mentored developers, supported technical decision-making, and improved team delivery practices.
- Ensured maintainable, scalable codebases aligned with product requirements and business goals.

EDUCATION

B.Sc. Information Technology | 2016 – 2019
